Trouble accessing 108 on portal?

The course enrolment on portal is not updating. We have reported the problem and hope that it can be resolved soon. In the meantime, here are the two links posted there:

The course website:

<http://www.cdf.toronto.edu/~csc108h/winter/index.shtml>

The Coursera site (login into portal before clicking on this link):

<https://utoronto.coursera.org/csc108-003>

Lab Rooms

Make sure that you've signed up for a tutorial time slot on ROSI. We call these "Labs".

Labs start this week and will take place in BA3175, BA3185, and BA3195.

You'll be assigned to one of those three rooms.

The lab room assignment will be posted to the course website by Wednesday afternoon. (It won't be updated on ROSI.)

Worksheets

We are going to use the **Function Definitions** worksheet from Friday today, so please get it out! If you weren't here on Friday, there are some extras on the desk at the front.

Pick-up the **Function Design Recipe** worksheet from the desks at the back or front of the room.
