

CSC108H Worksheet: For Loops Over Strings

For each function, add at least one example to the docstring and complete the function body.

1. `def count_uppercase(s):`
 `""" (str) -> int`

Return the number of uppercase letters in `s`.

`"""`

2. `def all_fluffy(s):`
 `""" (str) -> bool`

Return `True` iff every letter in `s` is fluffy. Fluffy letters are those that appear in the word 'fluffy'.

`"""`

3. `def add_underscores(s):`
 `""" (str) -> str`

Return `s` with an underscore between each pair of characters.

`"""`
